

# **STRATEGIC PROPOSITION FOR CHILD AND ADOLESCENT MENTAL HEALTH SERVICES IN LOW INCOME COUNTRIES IN ASIA**

**Mohammad S I Mullick**

**MBBS, PhD, FCPS, FRCPsych, DCAP, FAACAP**

**Professor of Child & Adolescent Psychiatry**

**Chairman, Department of Psychiatry**

**BSM Medical University, Dhaka, Bangladesh**

**Email: [msimullick@gmail.com](mailto:msimullick@gmail.com)**

# Talk plan

- **Highlighting features of child & adolescent psychiatry in low income countries in Asia**
- **Briefing magnitude of the child & adolescent mental health problems**
- **Discussing existing CAMHS**
- **Informing possible policy contents for feasible CAMHS**
- **Stating the proposed CAMHS strategic plan**
- **Concluding notes**

# Child & Adolescent Psychiatry in Low Income Countries in Asia

## Facts and findings

- <18Y: roughly 45% of population
- Subject to conditions with negative impacts that affect physical and psychological well being...poverty, malnutrition, illiteracy
- Conversely, subject to conditions with positive impact... traditional society, strong family support and a high degree of cohesiveness within the family, resiliency

# Child & Adolescent Psychiatry in Low Income Countries

## PREVALENCE

- Lal et al 1977 India 35.6%
- Geil et al 1981 Colombia 29%  
India 22%  
Sudan 10%  
Philippines 15%
- Almeida-Filho 1984 Brazil 23%
- Bird et al 1988 Puerto Rico 18-49%

# Child & Adolescent Psychiatry in Low Income Countries in Asia

## PREVELANCE

- Javed et al 1992 Pakistan 9.3%
- Kasmini et al 1993 Malaysia 6%
- Gureje et al 1994 Nigeria 20%
- Hackett et al 1999 India 9%
- Fleitlich et al 2004 Brazil 13%

# Child & Adolescent Psychiatry in Low Income Countries in Asia

## PREVELANCE

- **Mullick et al 2005 Bangladesh 15.2%**
- **Srinath et al 2005 India 12.5%**
- **Margot et al 2005 India 23.0%**
- **Syed et al 2007 Pakistan 34.0%**
- **Rabbani et al 2009 Bangladesh 18.3%**
- **Ali et al 2009 Bangladesh 14.9%**

# **Magnitude of the problems**

- **Around 15% of Children in Developing countries have emotional and behavioral problems**
- **Severe enough to result in substantial distress or social impairment**
- **Warranting a psychiatric diagnosis, and warranting treatment too**

# Existing CAMHS in Low Income Countries in Asia

- **Tertiary level :**  
Assessment, diagnoses, Treatment, community referral, periodic follow-up
- **Secondary & Primary level :**  
Inadequate efficiency in early detection & and intervention
- **Community Services :**  
Screening, Special education, vocational trainings, rehabilitation, hospital referral

# **Existing CAMHS in Low Income Countries in Asia**

- Specialized service restricted to tertiary hospitals**
- Inadequate provision for LD Psychiatry Services**
- No/less organized school health services**
- Nonexistence - poorly organized MDT**
- Little or no access for the vast effected children**

# Existing CAMHS in Low Income Countries in Asia

- **Massive gap exists between need and service provision**
- **Severe shortage of resources, professionals**
- **Little prospects of meeting this need in near or fur future by developing systematic and planned professional services despite of willingness & ability to accept modernity and scientifically based service model**

# **Key Strengths of Low Income Countries in Asia**

- **Relatively stable traditional society**
- **Strong family and neighborhood support**
- **Warm Teacher-Student relationship inherent in the culture**
- **Excellent infrastructure of NHS**
- **Adequate 'potential' manpower**
- **Good number of non-government agencies for child care**
- **Increasing awareness at all level**

# **CAMHS in Low Income Countries in Asia:**

## **Basic consideration**

- **Different from Western model**
- **Based on potential resources**
- **Part and parcel of NHS & NCHS**
- **Integrated part of NMHS**
- **Provided through School Health Service**
- **MDT will be different in composition and competency**
- **Collaborative between health, social & educational agencies**
- **Active involvement with private level**

# **CAMHS in Low Income Countries: Key components**

**Alternative ways of service model must be**

- Feasible**
- Local resource based**
- Practicable**
- Possible to initiate and expand**

# **CAMHS in Low Income Countries: policy contents**

**Adopting a policy to develop :**

- specialist-based services**
- resource-based non-specialist services**
- integrated services**
- school-based services**
- nongovernmental approach with  
community participation**
- governmental initiatives and support**

# **Feasible CAMHS in Low Income Countries in Asia: Strategic actions**

- **Fixing priority for combating most prevalent psychiatric disorders**
- **Developing paediatric-psychiatric liaison services**
- **Establishing alternate multidisciplinary team**
- **Short training of the potential manpower**
- **Involvement of the community**
- **Developing culture-specific, resourced – based and cost-effective treatment protocol**

# **Strategic Points for Feasible CAMHS in Low Income Countries**

**Provision for postgraduate training course for specialized service by child & adolescent psychiatrists**

**Provision of training of the trainers for offering training and supervision**

**Involving “potential” manpower- parents, teachers, child health working staff, GPs, social workers, counselors ,volunteers**

**Offering short training on child mental health problems to them**

**Offering coordinated services through health, education, social agencies**

# Proposed model of CAHMS for Low Income Countries in Asia

- **Primary level – Non-specialist level**

- Primary care service-GPs, PHWs
- Social Welfare Service-Counselors
- School Health Service- Teachers
- Trained Child Mental Health Worker
- Trained parents

- **Secondary level – Non/Specialist level**

- Specially trained GP, pediatricians, neurologists
- General Psychiatrists, Psychologists/ Behavioral Scientists
- Social Welfare Worker

- **Tertiary level – Sub-specialist level**

- Child & Adolescent Psychiatrists
- Child & Adolescent Clinical Psychologists
- Child & Adolescent Psychiatric Social Worker
- Child & Adolescent Psychiatric nurses

# Role of International & Regional Organizations : Few Suggestions

- **Establishing dialogues**  
regional/national psychiatric organizations
- **Coordinated initiatives**  
for improving child mental health training
- **Assistances and partnership**  
in exchange programs, e.g., experts in training  
& research projects
- **IACAPAP Assistance program**  
for supporting feasible action plans

# Child & Adolescent Psychiatry in Low Income Countries in Asia

## CONCLUSIONS

- Vast gap between service need and service provisions
- Urgent need to adopt a policy and action plan for CAMHS in low income countries to move from ideality to reality
- Significant improvement recent years & room for further improvement
- Conducting innovative researches on possible ways of feasible services considering socio-cultural- economic and resilience factors in low income countries for providing the data in favor of practicable CAMHS
- Potential collaboration and networking among regional & international community

Thank you all
